Partnership Stayen – Stadia Connect

We would like to express that we are very satisfied about our very close partnership with Stadia Connect.

The company helped us developing our own app, namely our 'STVV-app'. The configuration of the app happens without any problems. All our processes have been automated, thanks to Stadia Connect, which makes that we are able to work faster and more efficient. The connection with our CRM-system is very good.

We were aware of the fan's expectations in being able to be connected through their devices. They want to be connected with their friends, wherever they are. That's why Stadia Connect has installed a solid WI-FI connectivity. Fans and visitors now have easily and wireless connection in and around the Stayen Stadium.

At last Stadia Connect has developed a flexible system for our 'Man of the match'. This system is a combination of an old, existing system of our supporters clubs and a common system of registered users' votes.

We could describe Stadia Connect as an innovative partner, who is always in for new ideas and new projects. We are very pleased to have Stadia Connect as our partner.
